Horror face

In this exercise you will be creating a face from just the parts.

Each page has some instructions on what to change.

First, let's get all the main parts loaded onto the page.
The two eyes and nose are already done for you.
For the moment it doesn't matter where they are.

```
62 <body>
63   <div class="container">
64     <div class="face">
65       
66       
67       
68
69
70
71     </div>
72   </div>
73 </body>
```

After the nose, add these lines for the ears and mouth.

```

```

```
10  .face {  
11      position: relative;  
12      width:700px;  
13      height:800px;  
14      border:black solid 2px;  
15  
16  
17  }
```

Add two new lines to make the face outline.

```
border-radius:50px;
```

```
background-color: lightpink;
```

Try a much bigger number for the border-radius as well and choose a different colour.

Now move all the parts to where you want them.

Each part has a position called top and left. The left eye is shown below as an example.

```

19    
20    
21    
22    
23    
24    
    .leftEye {  
      position: absolute;  
      top: 5px;  
      left: 10px;  
      width: 40px;  
      height: 30px;  
    }
```

Change the top and left numbers to move the parts around.

Any of the parts can have their shape changed by using the width and height numbers.

```

21  
22  
23  
24  
    .leftEye {  
      position: absolute;  
      top:5px;  
      left:10px;  
      width:80px;  
      height:80px;  
    }
```

Change the width and height numbers to stretch the parts.
The numbers don't have to be the same.

Finally, there are five different eyes to use and three different mouths. To use them you need to change the name of the part.

```
62 <body>
63   <div class="container">
64     <div class="face">
65       
66       
67       
68       
69       
70       
71     </div>
72   </div>
73 </body>
```

Now arrange everything and choose the parts you need for the most horror face!
