

Web Development – Introduction

Dunolly Exercise

Modify dunolly02.html to create the web page shown.

CSS Exercise

dunolly3.html

Add positioning properties for the h1 and .txt styles as well as creating a new style class called image1 for the image.

Set the image1 style zindex property to 0 so that it is behind the text. Use absolute positioning along with top, left, width and height properties to arrange the web page to look like that shown.
