

Web Development – Introduction

Flexbox Exercise

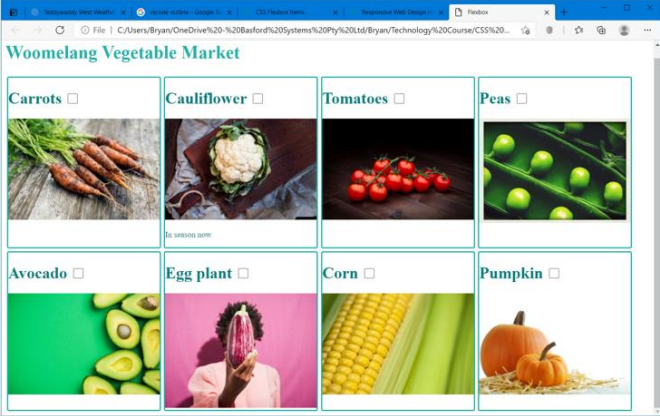

Download flexbox01.html

CSS Flexbox

Modify flexbox01.html to create a web page similar to that shown.

Note that with flex-wrap:wrap set, the page is somewhat responsive to changes in screen size.

flexbox01.pdf

The screenshot shows a web browser window displaying a page titled "Woomelang Vegetable Market". The page features a grid of eight vegetable items, each with a title, a checkbox, and an image. The items are arranged in two rows of four. The first row contains Carrots, Cauliflower, Tomatoes, and Peas. The second row contains Avocado, Egg plant, Corn, and Pumpkin. Each item has a small checkbox to its right. The browser's address bar shows the file path: C:\Users\Bryan\OneDrive\20-20\Bastford\20Systems\20Py\20L16\Bryan\Technology\20Course\CSS\20...

The following styles will need to be defined:

.heading (partially supplied)

.container

.item

img

input

The .container style will need:

display: flex;

flex-wrap: wrap;
