

Web Development – Introduction

Simple Positioning

Positioning is not always easy. These examples show some techniques, but you should experiment with the HTML and more particularly the CSS code to get a better understanding.

CSS Positioning

Positioning methodologies

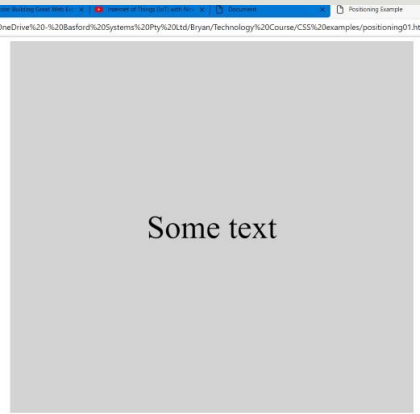

- Static (default)
- Relative
- Absolute
- Fixed
- Sticky

} 3 x most important

Example: Centre a div and centre text within the div

positioning01.html

positioning01.css

The screenshot shows a web browser window with a single tab titled 'Positioning Example'. The address bar contains a file path: 'file:///C:/Users/Bryan/Technology/Course/CSS/Examples/positioning01.html'. The main content area of the browser displays a large grey rectangular box with the text 'Some text' centered horizontally and vertically within it.
